Observations

Keep full and well closed in a dry place and away from light.
The storage life can be guaranteed for minimum 24 months in tightly locked containers at a temperature of + 10°C up to +30° C.
A turbidity of the oil due to coldness is reversible and can be removed by heating up to more than 40°C.
Freezing point of castor oil is -13°C so turbidity may be started at -13 °C.
